### Size Reduction Specialists Corp.

3510 West Rd.  
East Lansing, MI 48823 United States  
517-333-2605; 517-333-8870 (fax)  
sales@srscorp.com  
www.srscorp.com

Size Reduction Specialists is a leading manufacturer and supplier of press-side Bi-Center screenless granulators for the injection molding industry. With over 60 years combined experience, SRSC is committed to providing the customer with personal and knowledgeable solutions to their granulation needs. Our patented, two-stage cutting system provides premium, uniform particles. Powder and long free particles enhance the molding process. Hinged doors swing upright for total accessibility for clean-out and maintenance. The Bi-Center increases efficiency and reduces costs by providing a low RPM and low maintenance granulator that produces quality material.

### Sorema, Div. of Previara K. Srl

Via dei Platani 11  
Alzate Brianza (CO) 22049 Italy  
39-031-6-555-700; 39-031-619041 (fax)  
sales@soremait  
www.soremait

Sorema offers a complete range of plants and machinery to recycle and to peak plastics and industrial, farming or post-market wastes. Sorema modular lines may be combined in different ways, in order to guarantee the most rational suitability for different utilization issues and the best quality level of finished products. This allows the recycling of plastics deriving from different disposal modes (featuring various types of contaminating agents, packaging characteristics or polymers). We can offer a wide product range, including plants for films and bottles, automatic separation systems, prewashing and extrusion lines for films and bottles, treatment plants for the recycling of mixed packaging such as HDPE, PS, PP, PVC, AL, plants for PET bottles, stretch films and farming films recycling. For further information please visit our website at [www.soremait](http://www.soremait).

### Vecoplan Maschinenfabrik GmbH

& Co. KG  
Vor der Birz 111  
Bud Marlenberg 56470 Germany  
49-2661-6267-0; 49-2661-6267-70 (fax)  
vecoplus@vecoplan.de  
www.vecoplan.de

Vecoplan is the world's largest manufacturer of industrial scrap size reduction equipment. As the world leader in the industry, Vecoplan's single shaft rotary grinders, plastic shredders, conveying systems and full turnkey engineering services are second to none. Vecoplan has a substantial presence on all of the five continents and has evolved into the undisputed leader of state-of-the-art size reduction and recycling systems. Vecoplan's full plastic equipment line includes:

- Shredders
- Chippers
- Conveyors
- Separation technologies
- Loading and unloading equipment
- Turnkey systems

For more information please visit our web site [www.vecoplan.de](http://www.vecoplan.de).

### BLOWMOLDING SYSTEMS

### Graham Engineering Corporation

1263 Eden Rd.  
York, PA 17402-0873 United States  
717-848-3753; 800-966-3702  
717-848-1931 (fax)  
sales@grahamengineering.com  
www.grahamengineering.com

Graham Engineering Corporation offers a complete line of extrusion blow molding equipment, including linear shank machinery, rotary wheel equipment capable of single or dual parison, one bottle per parison or neck-to-neck, with capability ranging from 9 to 30 liter industrial containers to 25 stations (up to 96 cavities) for high capacity production of single serve bottles, over one million per day, sin-

gle and dual head accumulator machinery from 1 kg to 34 kg shot capacity; reciprocating screw machine systems for polycarbonate water bottles; reciprocating screw and shot pot machinery for production of lightweight HDPE dairy and water containers. GEC offers a full range of capabilities, including multi-layer co-extrusion, in-mold labeling, view-stripes and triniting.

# TECHNE<sup>®</sup>

S.p.A.  
Technipack Engineering Italia

### Techne Technipack Engineering Italia SpA

Via Della Tecnica, 75  
San Lazzaro di Savena (BO) 40068 Italy  
39-051-622-7511; 39-051-625-6709 (fax)  
info@techne-it.com  
www.techne-it.com

Techne Technipack Engineering Italia SpA is an extrusion blow-molding machines manufacturer with 22 years experience, a highly skilled technical staff, 3 branches and a consolidated network of agents and collaborators.

- 850 machines sold in 60 countries, a constant attention to innovation and technological development according to customers' expectations.
- Techne is a "Global Solution Provider" supplying both standalone machines and complete engineering lines, providing with high-added value in terms of quality, durability of investment, productivity and high efficiency.
- During K 2007 a new revolutionary EBM mecatronic machine will be presented: ADVANCE<sup>®</sup> model ADV4-510, totally electric, modular, flexible, with low maintenance and consumption.
