Turnkey solutions for the plastic packaging market

The new ADVANCE ADV4-510 is a totally electric, modular and flexible blow moulding machine suitable for industrial, food and pharmaceutical applications.

The SYSTEM 5900-700 is equipped with the fast cooling VELTECH® system; it combines high clamping with simple maintenance for intense industrial production.

The SYSTEM 10000-T900 with a twin long stroke shuttle is suitable for both industrial and food application. Aseptic version available.
